## WEBSITE MANAGMENT PROGRAM

**Focus on what you do best. we'll take care of the rest, behind the scenes.**

Over the years, we have conducted hundreds of user groups, one-on-one interviews, and group discussions with IT Managers, Marketing Managers, Digital Marketing Managers, and CEOs. One thing we discovered is that IT Teams spend nearly 70% of their time engaging with a team that is not specialized solve their day-to-day website issues and carry out updates. To make a difference in your organization, your IT team needs an expert team and hand-holding support, benefits marketing and reputation so you can focus on what you do best.

The program is made of years of experience and enhanced with keeping systemization and client satisfaction in focus. Introduced in back 2017 and since then it's been 4 major revisions. The journey is not yet an end, we were continuously improving considering current and future internet threats. Our objective is to make this program so robust that any website falling under our website maintenance program will be 100% safe and secure.
